# ABOUT US

SEGA GROUP CHEMICALS joined the “World of Textiles” in the year 2019. Segagroup is a company that aims to be a leader in it. Segagroup, which continues its research and development activities in line with the developing technology and aims to always progress open to development with its active staff, started to make a difference with its product quality price ratio in a very short time. It offers rational and practical solutions for needs with its ever-growing product range. Segagroup, was able to announce only the name is not in Turkey and in many foreign countries have proved the quality of products.

Having a creative and dynamic working approach, SEGA GROUP continues to exist in line with its skilled human resources, strong technical infrastructure and correct financial management skills. Segagroup, which brings identity to the chemical industry and textile, maintains and continues to maintain our place among the leading companies in the industry with customer satisfaction, innovation and fast service.

Acting fast, accompanied by our experts, we respond to the questions and problems of our customers in the fastest way, while providing mutual benefits to our customers by providing project collaborations to gain an advantage over their competitors.

Our vision is to expand our world market with our product quality as a leading company sought worldwide in line with our global and innovative solutions for the production and supply of chemical products.

Our mission is to be an innovative and environmentally friendly company that provides world-class service by discovering solutions that focus on the changing needs of our customers.

We are leading new approaches in Segagroup to help

companies access quality textile chemicals.

- Customer oriented principle
- Supporting with knowledge and innovation
- Increasing the competitiveness of our brand and business partners  
Attaching importance to ethical values such as Accuracy, Equality, and Reliability,  
We are a CHEMICAL company that works for a sustainable future.
